

VIT Accredited ASD Training for Educators

What we deliver:

- Tailored training
- Hands on learning
- Evidence based strategies
- VIT accredited
- Delivered at your setting
- Transdisciplinary approach

We can help!

On Track Therapy Group provides outstanding training opportunities through programs that are practical, evidenced based and engaging that can be used in real world settings for all children.

Through On Track's tailored professional development programs, educators will be supported in enabling all children within their class to succeed. Our highly experienced team will work collaboratively to support and provide practical skills that complement your learning environments and support all students to lead productive and positive lives.

How we do it?

All our training is relevant to both educators and children's learning needs. We use an experiential learning model where participants are given the opportunity to deeply engage in hands on activities that are tailored to individual classrooms.

What does this mean?

It means that educators have access to a transdisciplinary team. Our approach to delivery is one of the most significant points of difference for professional development delivery.

On Track provides a one stop shop of professionals for educators to access and will support teachers and extensively contribute to educators knowledge of how to design and implement teaching activities that support the learning and participation of their own learners.

Having access to psychologists, speech pathologists, paediatricians, teachers and occupational therapists

that work collaboratively will enable the combined knowledge of these professionals to impart expertise across developmental domains with the understanding of operational requirement and pedagogical parameters of educational settings.

Will this count as approved professional development?

Yes it will!

A certificate of completion will be provided to all participants to meet professional development outcomes. Content will encompass the Australian professional Standards for Teachers. These include

- 1.1 Physical and intellectual development and characteristics of learners
- 1.2 Understand how learners learn
- 1.5 Differentiate teaching to meet the specific learning needs across the full range of abilities
- 1.6 Strategies to support full participation of learners with disability
- 3.5 Use effective communication with learners
- 4.1 Support participation of learners
- 4.4 Maintain the safety of learners
